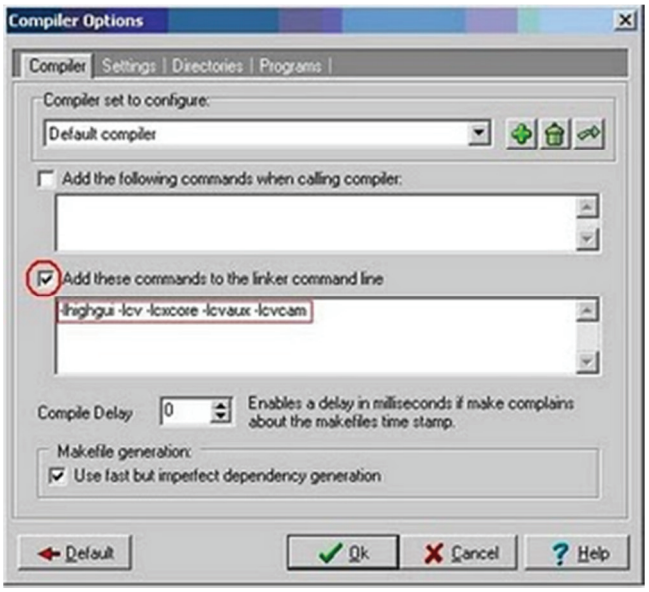
Integrating OpenCV and DEV C++

1.) After installing OpenCV and Dev C++, open Dev C++.

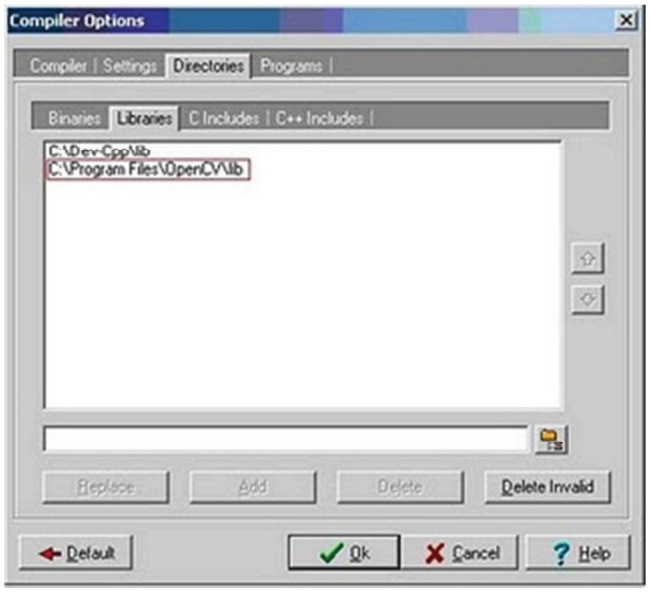
2.) In Dev-C++ open the menu "Tools->Compiler options".

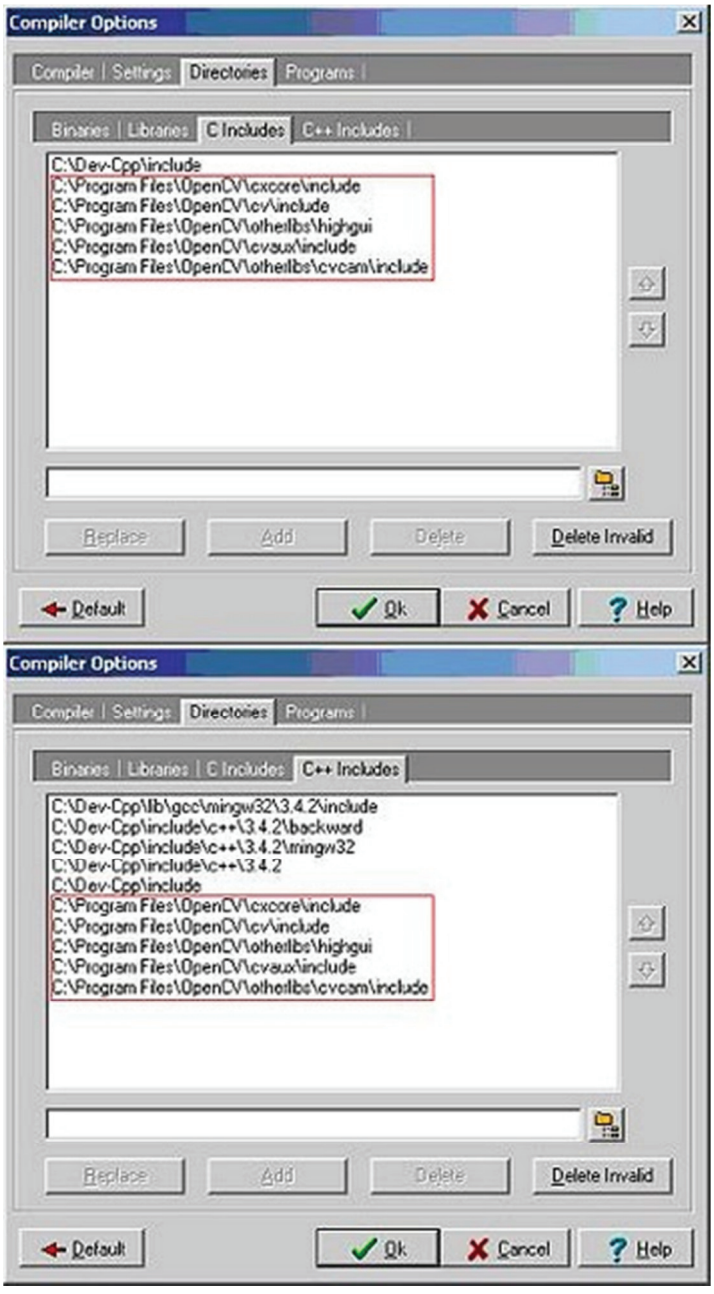
3.) In the first tab("Compiler") you need to check the box "**Add these commands to the linker command line**".

4.) type the following line in the text bow below:
-lhighgui -lcv -lcxcore -lcvaux



5.) Go to the sub-tab "Libraries" in the tab "Directories" and add there **C:\Program Files\OpenCV\lib** to the paths:



6.) Now switch to the sub-tabs "C Includes" and "C++ Includes" and add these paths:


C:\Program Files\OpenCV\cxcore\include
C:\Program Files\OpenCV\cv\include
C:\Program Files\OpenCV\otherlibs\highgui
C:\Program Files\OpenCV\cvaux\include
